Santa Fe, New Mexico 87505

Subject: Calendar Year 2009 (CY09) Annual Groundwater Monitoring Report (Report)
Containing Information on the Groundwater Remediation and Monitoring Activities

Dear Mr. Bearzi:

Enclosed is a copy of the CY09 Annual Groundwater Monitoring Report for the Department of Energy/National Nuclear Security Administration (DOE/NNSA) and Sandia Corporation (Sandia). This report contains information on the groundwater remediation and monitoring activities conducted by Sandia during CY09.

This report is being submitted to the New Mexico Environment Department (NMED) Hazardous Waste Bureau, to meet periodic reporting requirements for groundwater monitoring discussed in Section X.D of the Compliance Order on Consent between NMED, DOE/Sandia Site Office and Sandia. Specifically, the report meets the annual reporting requirement for Tijeras Arroyo Groundwater, the Technical Area V Groundwater Investigation, and the Burn Site Groundwater study areas.

In addition, the Report is also being submitted to the NMED DOE Oversight Bureau as a condition in the Agreement in Principle between NMED and DOE which states that DOE will make available the data resulting from groundwater monitoring activities at Sandia National Laboratories/New Mexico (SNL/NM).

The Report is also submitted annually to Kirtland Air Force Base (KAFB) as a condition of the agreement between DOE and KAFB for the sampling of groundwater monitoring wells on land permitted by the United States Air Force to DOE. The agreement requires DOE and SNL/NM to provide an annual update of the results of the analysis of groundwater samples collected from the permitted monitor wells. Copies of the Report are also provided to a list of additional stakeholders as a method of informing the public of the results of DOE and SNL/NM groundwater monitoring.

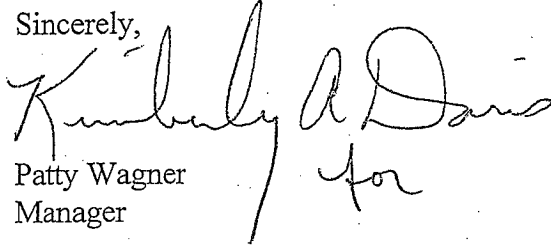

James Bearzi
